1. Rabies___ 2. Distemper/Leukemia _____ 3.FIV-AIDS _____ outside cat.

Cat(s) have been TESTED negative for nos. 2 and 3 above/ ___yes ___ no

As your pet's caregiver, is there anything I should be aware of either medical, physical or behavioral that I need to know to keep them safe, comfortable as well as keeping other pets in my care safe when around your pet?

Some examples of behavioral issues are:

Escape issues - digging (digging to escape), climbing or jumping fences to escape?

Known excessive barking when kenneled?

****A normal amount of barking is expected but continuous barking is a sign of stress in your animal and causes stress in animals around him/her. If this occurs you will be asked to consider some type of sedative for the well being of all kennel occupants as well as your own pet.**** This medication is not to knock your animal out but to calm them.**

Scared of storms ?

Aggressive behaviour toward humans or other animals?

Hard to catch, won't listen?

Are they destructive when kenneled? You are responsible for any damage done to the kennel.

Physical:

Do they have mobility issues? Can they safely navigate the kennel you have chosen?

Medications?

IF so what are they and dosage I need to give?

WAIVERS

I, being the owner or agent for the animal, have looked over the kennel structure and property and deem it safe for my pet to stay. I do not hold the kennel owner or staff liable for accidents that may lead to injury or even death of my pet(s) or myself as a result of activities.

No flea and tick meds waiver –

I want my pet turned out in the play yard even though they are not medicated for fleas and ticks. The Beech Grove kennel is not responsible if my pet has fleas or ticks when picked up.
